

FINDING NEW SOLUTIONS FOR MORE EFFICIENCY.

SEE THE CHANGES >>

The new generation of booster pumps.

We have made changes to the next generation of booster pumps. From lighting to controls, these new features will improve the efficiency and safety of your operation.

WHAT'S NEW

- ✓ Electric over hydraulic controls
- ✓ Improved lighting package
- ✓ Compact design
- ✓ 1,000 lbs lighter
- ✓ Partially enclosed engine
- ✓ Engine compartment side doors for easier maintenance
- ✓ Updated A-frame tongue for better towing, stronger structure and creates storage for accessories
- ✓ Crossover pig shooter allows for pigging operations opposite the pump outlet for improved operator safety
- ✓ Over 17 inches of ground clearance
- ✓ Better towing package
- ✓ Steel tanks contain low point crossover
- ✓ Merged hydraulic systems eliminate the need for two reservoirs
- ✓ Bumper step
- ✓ 12VDC charging posts to power external items

Better towing

- > The A-frame tongue is a stronger structure, along with weight and balance make for better towing

Feeder capability

- > Warthog package offers hydrostat transmission to run a secondary feeder pump

Improved ground clearance

- > Over 17 inches of ground clearance

Improved aesthetics

- > Improved lighting package and the engine is enclosed with compartment side doors for easy maintenance
