

HD FUEL HOSE

Industrial Water and Fuel Transport Hose

BullDog's HD Fuel Hose is an ultra-premium lay-flat hose designed to transfer fuel in the harshest conditions. HD Fuel Hose features a through-the-weave one-piece jacket construction with a circular-woven, high-tenacity polyester reinforcement that is completely protected with a tough elastomeric polyurethane cover and lining. This re-engineered hose is designed to provide maintenance free performance. Setting it apart from the standard fuel hose, HD Fuel Hose is manufactured with a harder plastic to resist abrasion in all environments and intended to withstand the most demanding conditions. While at working pressure, maximum elongation is held under 3% due to the use of specialty yarns in its customized construction. The lower elongation minimizes hose movement during pump cycles, reducing damage and extending hose life.

HD FUEL HOSE

FEATURES:

Durable Construction

Features a unique through-the-weave one-piece construction comprising a circular woven high tenacity polyester reinforcement totally encapsulated in a tough elastomeric polyurethane cover and lining.

Exceeds Standards

HD Fuel Hose is designed and manufactured to meet or exceed the performance specifications of MIL-PRF-370.

Additional Hardware

A wide range of couplings, manifolds and hardware available for connecting the hose to additional segments, fluid supplies or auxiliary hardware.

Lay-Flat Design

Long, continuous lengths can be quickly deployed and retrieved using light duty or power-driven reels.

Operating Temperature Range

-58°F to +158°F (-37°C to 70°C)

Extreme Durability

Improvements to plastic toughness and reduced hose elongation at pressure help to protect HD Fuel Hose from damage and extend service life.

TECHNICAL SPECIFICATIONS:

Size	Pressure		Wall Thickness	Weight
	Working	Burst		
inch mm	psi kpa	psi kpa	inch mm	lbs/ft kg
8 203	300 2,068	600 4,136	.19 4.83	2.25 1.021
