

FROSTY'S DRAGLINE TESTIMONIAL

Be More Efficient Every Season with Pump School

After his first time attending Pump School, Brian Frost of Frosty's Dragline learned how to increase his operation's efficiency, as well as many key safety aspects of the job.

When Frost brought his crew back to attend another Pump School, he saw just how much every crew member in manure application can learn. Now, after attending three Pump Schools, Frost is well aware of how equipment works, how to maintain the equipment for optimal efficiency, and how to run a safe manure application operation.

Frosty's Dragline knows they can always call Puck, multiple times a day, with any questions they have. Experienced employees will even meet them on the job to help out if needed.

Puck employees will meet you on the job for help

Brian Frost is a Pump School regular

"Every time I've gone to Pump School I've learned something new."
