

COUNTY LINE CUSTOMS TESTIMONIAL

Puck Hose Carts & Turn Table Reels Keep It Simple

Even after a decade of pumping, Justin White knows that Pump School is worth attending at least once a year. He also knows that Puck equipment stands the test of time. From his first day to now, he's been using Puck Hose Carts.

Hose Carts were one of Puck's first products, and the innovation is clear: it improves the job and doesn't break down. County Line Customs started with the HC 8 until they eventually expanded into the TTR 20.

Throughout the years, the "keep it simple" concept has worked for this crew. Not only is it easy to teach new members how to use, hose carts require little to no maintenance.

"It's built by applicators for applicators, and that's really what has always helped me with my decisions with my business moving forward."
