

LUCKEY'S PUMPING SERVICE TESTIMONIAL

Innovation Impresses Long-Term Customers

Kyle Luckey of Luckey's Pumping Service LLC has been using Puck equipment in his Nebraska-based dragline operation since 2009.

Although Luckey still uses equipment that is more than a decade old with minimal maintenance, he has been impressed with his new equipment and its upgrades. Better valves for fewer SCV uses on the tractor, better slew bearings, and more robust equipment gives the crew more confidence in the field.

Innovative updates to Puck equipment provide Luckey's Pumping with reliable, field-tested equipment as they upgrade their operation for more gallons.

"The HC 16s are just bulletproof. All we've done in 12 years is put new tires on it, grease it, and tighten the chains."

Luckey's previous generation of equipment still holds up
