

WIKNER CUSTOM PUMPING TESTIMONIAL

Achieving Goals in Year 1 of Business

Ben Wikner of Wikner Custom Pumping in Northeast Iowa had a successful first year working with dragline equipment.

Wikner's motto is simple; "Right Gallons, Right Acre, Right Time." To do this within the narrow window of application, they rely on equipment built for custom operators, by custom operators. That's why he relies on the field-tested equipment from Puck.

After their first successful year of dragline operations, the Wikner crew attended Pump School to get more in-depth knowledge to increase their efficiency next season.

Puck's field-tested equipment is reliable

Ben Wikner of Wikner Custom Pumping

"I need equipment that's going to work every day. Working with Puck has helped me achieve those goals of customer satisfaction."
